

Docling Sample PDF

A compact PDF to test layout, table extraction, and text parsing.

Section 1: Introduction

This sample PDF is designed to exercise PDF loaders like langchain_docling. It contains headings, paragraphs, bullet lists, and tables with headers. Use it to test chunking and table structure detection.

Key Features Included:

- Multiple sections with headings
- Bullet list and code snippet
- Two tables: (1) simple data table, (2) table with merged headers

Example Code Snippet

```
from langchain_docling import DoclingLoader
loader = DoclingLoader("docling_sample.pdf")
docs = loader.load()
```

Table 1: Simple Quarterly Metrics

Quarter	Users	Sessions	Conversion %	Revenue (\$k)
Q1	1,250	8,900	3.2	45.1
Q2	1,480	9,350	3.6	49.8
Q3	1,620	9,920	3.9	53.0
Q4	1,800	10,500	4.1	58.6

Section 2: Advanced Table

This table includes merged header cells to better stress table structure detection. Values are illustrative only.

	Traffic		Engagement	
Page	Visits	Unique	Avg. Time (s)	Bounce %
Home	4,230	3,900	62	38.1
Pricing	2,110	1,980	71	33.5
Docs	3,420	3,100	95	27.8
Blog	1,980	1,800	84	41.2

Section 3: Additional Notes

Docling aims to reconstruct document structure such as headings, lists, and tables. This sample is intentionally compact but diverse in layout to provide a quick sanity check. For more stress testing, duplicate sections or enlarge the tables to produce longer documents and more complex layouts.

Paragraph 1: Docling aims to reconstruct document structure such as headings, lists, and tables. This sample is intentionally compact but diverse in layout to provide a quick sanity check. For more stress testing, duplicate sections or enlarge the tables to produce longer documents and more complex layouts.

Paragraph 2: Docling aims to reconstruct document structure such as headings, lists, and tables. This sample is intentionally compact but diverse in layout to provide a quick sanity check. For more stress testing, duplicate sections or enlarge the tables to produce longer documents and more complex layouts.

Paragraph 3: Docling aims to reconstruct document structure such as headings, lists, and tables. This sample is intentionally compact but diverse in layout to provide a quick sanity check. For more stress testing, duplicate sections or enlarge the tables to produce longer documents and more complex layouts.

Paragraph 4: Docling aims to reconstruct document structure such as headings, lists, and tables. This sample is intentionally compact but diverse in layout to provide a quick sanity check. For more stress testing, duplicate sections or enlarge the tables to produce longer documents and more complex layouts.

Paragraph 5: Docling aims to reconstruct document structure such as headings, lists, and tables. This sample is intentionally compact but diverse in layout to provide a quick sanity check. For more stress testing, duplicate sections or enlarge the tables to produce longer documents and more complex layouts.
